BLAKELEY
CONSTRUCTION PROFILES

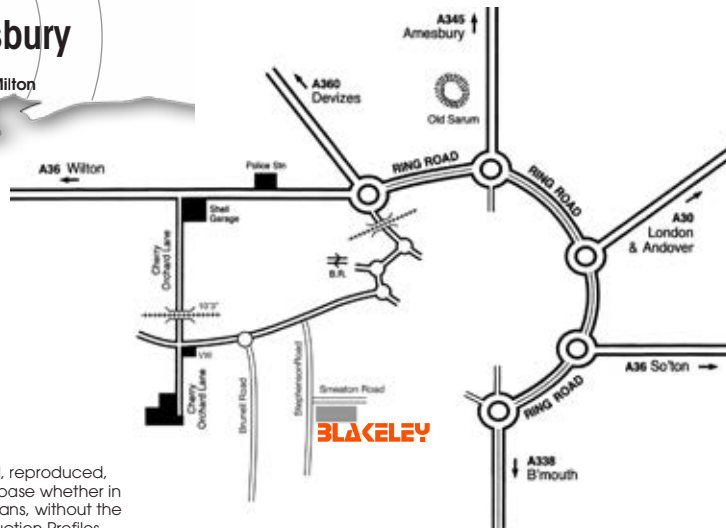

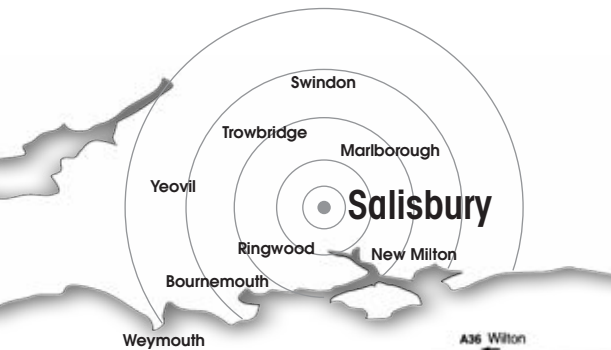

ABOUT BLAKELEY

Welcome to our new Blakeley Product Guide – Sixth Edition

At BLAKELEY PROFILES, we offer an unrivalled service, backed up by a friendly, knowledgeable and helpful team, to assist you in sourcing whatever window trim and roofline requirements you have.

Having had experience in the construction industry since 1997, we have built up an understanding of the trade, and have grown year on year without sacrificing any of the basic principles that the company was founded on: honesty, reliability and integrity.

We offer a next day delivery service, throughout Wiltshire, Somerset, Dorset and Hampshire. Being a specialist merchant, our stock levels are high, ensuring your deadlines are met. Outside of these areas we also use a reliable courier company so we can cater for your requirements nationwide!

WE CAN SUPPLY ANY COLOUR

We are an established supplier of colour roofline and rainwater systems that can satisfy the creative flair of home-owners, developers and architects.

Utilising our in house spraying facility, we are able to supply coloured roof lanterns, roofline and rainwater goods direct from our factory in Salisbury.

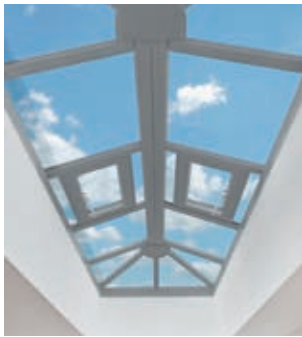

Once you have selected your desired product and colour we will work closely to ensure all the items required are supplied. The goods will be taken out of our warehouse and prepared and sprayed to a high standard, and once cured will be packaged ready for despatch or collection.

We are able to offer a nationwide delivery service for goods up to 5m long.

WE SUPPLY

We at Blakeley feel you shouldn't have to compromise on colour in any part of your home. This is why we offer a bespoke range of colours and finishes for roof lanterns, roofline and rainwater goods so that homeowner's dreams can become realities.

Coloured Roof Lanterns

Coloured Fascia and Soffit

Coloured Cladding & Guttering

FINISH OPTIONS

We offer four finishes to complement any property, whether you have a traditional or contemporary style house, with timber, aluminium or pvc windows.

SMOOTH

Choose from Gloss, Satin or Matt for your modern home.

TEXTURED

Textured colour is a niche in the market which has been recognised by Blakeley. Give your colour a look that mimics aluminium without the expense.

WOODGRAIN

The Woodgrain finish will give you all of the benefits of timber without the need to regularly repaint. All it requires is the occasional clean.

METALLIC

Choose your desired colour and make it stand out with a Metallic fleck to really enhance your property.

COLOUR OPTIONS

We can spray any fascia, soffit, guttering and cladding system in this product guide to any colour.

We usually paint to RAL, BS or NCS colour palettes, but can match to other systems, or to an existing colour, as long as you are able to send a sample of it to us.

The gallery on the next pages may give you some inspiration if needed, or view our website for more ideas.

SOME RECENT PROJECTS

6

Cornwall Project

Cast iron style gutter and downpipe supplied to an old fishing cottage in Cornwall. we matched this colour to an existing paint swatch - to the homeowner's delight!

Rainwater Goods

We supplied the guttering to this home office refurbishment near Clapham. Finished in RAL7032 it complements the timber fascia and windows perfectly.

Housing Estate in Warminster

Fascia and soffit finished RAL9001 was specified for this project to match the windows. A mid sized development of 12 houses.

Cast Iron Guttering

Cast Iron rainwater goods were supplied to finish off this delightful extension to a period property in rural Dorset.

Wokingham Chalet Bungalow

A large chalet bungalow near Wokingham with RAL7039 fascia and soffit to match the aluminium windows.

Cornwall Development

A development of four family houses with garages, we supplied fascia and soffit finished in RAL7037 to match the doors and windows.

Rainwater goods for a Log Cabin

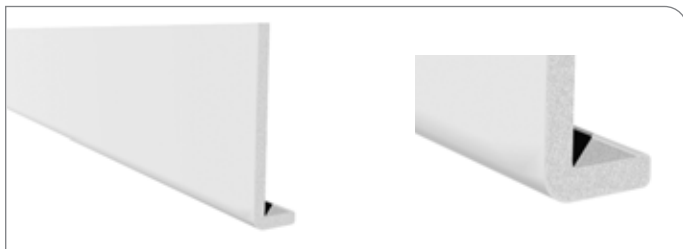

PVC guttering supplied to a log cabin manufacturer in RAL7034 Yellow Grey to match the doors and windows.

10mm CAPPING BOARD

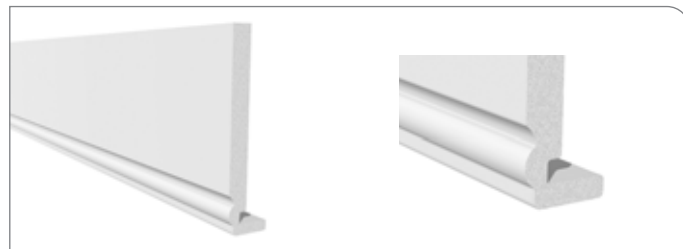

Items on this page can be painted any colour. See page 4-5 for more details.

PREFERRED INSTALLATION METHODS

Refurbishment using capping board and Multi-purpose Soffit

Stainless steel fixings must always be used

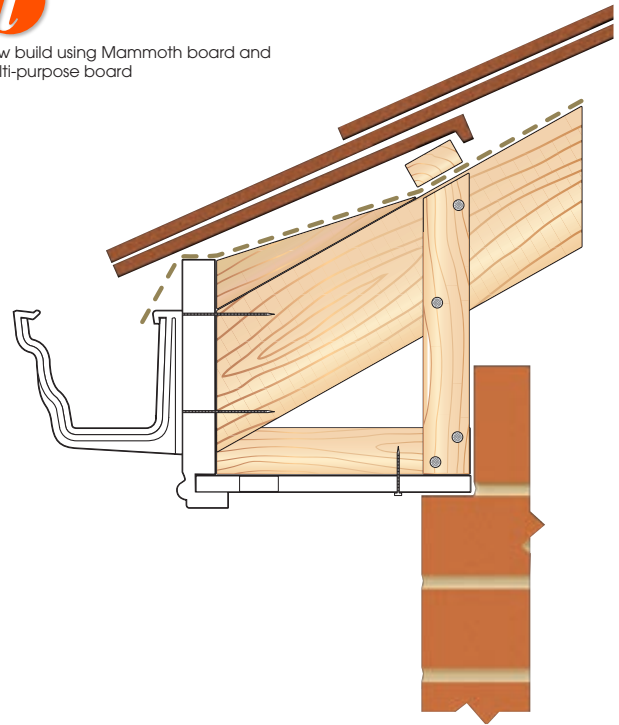

The Fascia should have a suitable existing or new backboard. The capping board should be fixed so that the weight of the eaves course of tiles is distributed across the backboard and/or tilt fillets.

The soffit board should be supported on bearers at the foot of every rafter and be securely supported at each end.

A preferred method is to support them by battens nailed or screwed to the rafters as shown in the diagrams. The bearers should be checked for line and level and suitable packing installed where necessary.

New build using Mammoth board and Multi-purpose board

When Mammoth Fascia is specified the roof covering should be supported by adequate means at the rafter ends. This can be by means of a tilt fillet, lay board or a shaped batten which extends the full length of the roof line.

A lay board is particularly desirable in the case of pitches less than 30° as it will prevent any sagging of the Sarking felt.

Vented soffit boards are available in a range of sizes when roof ventilation via the soffit is specified. The boards fit into the groove of the Mammoth Board and should be fixed to suitable soffit bearers.

18mm MAMMOTH FASCIA BOARD

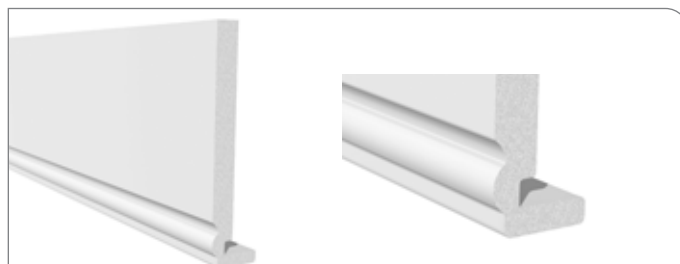

Items on this page can be painted any colour. See page 4-5 for more details.

DV350	350mm S/R Edge	●							
DV450	450mm S/R Edge	●							

Fascia corners cover the mitred ends of fascia boards. Use double leg corners with large fascias or when making up box ends.

Fascia joiners are used to cover butt joints in fascia. Use double leg joiners with large fascias or when making up box ends. Finials are an attractive alternative used at gable end peaks.

Always allow a 5mm expansion gap between boards. Fix joiners with polytop pins, super glue or a gap filling adhesive.

Available in white and woodgrain options
- see page 16 for swatches

Fix horizontally, vertically or diagonally to exterior surfaces to achieve a strong protective and decorative surface.
Use shiplap or V joint to complement the property.

A 25mm air gap must be maintained to allow air to circulate and a vapour permeable barrier should be used in situations of timber studding or walls which are not fully weather tight.

17

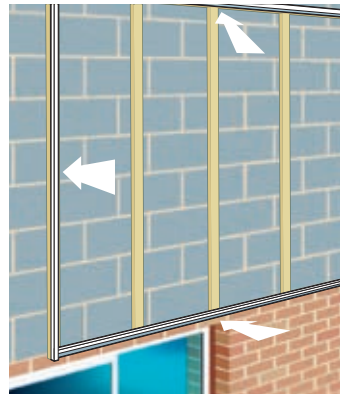

CLADDING INSTALLATION GUIDE

Illustration of typical horizontal fixing

Fix perimeter frame and intermediate vertical battens to wall.

Fix all perimeter trims.

Fit first plank at base.

Fit remaining planks and engage male part of two part trims.

LAMINATED WINDOW BOARDS

Items on this page can be painted any colour. See page 4-5 for more details.

Window Boards are 22mm thick and have a melamine laminate finish, bonded to a P3 moisture resistant chipboard core.

- Suitable for most window and conservatory applications
- Heat resistant and easy to fit
- Scratch and abrasion resistant
- No painting or finishing required
- Available in five finishes and a range of 8 widths

COMPOSITE DECKING

Our wood-polymer composite (WPC) decking boards are a low maintenance and much longer-lasting alternative to timber deck boards.

- Premium wood-grain effect boards
- Engineered with plastic cap for maximum possible durability
- Minimal expansion, fading and staining

CUSTOMISED PRODUCTS & SPECIALIST GUTTERING

Bespoke products can be produced and manufactured to customers requirements.

Illustrated here is a casting taken from a source product to ensure the polyurethane replica perfectly matches the classic wooden original.

CAST ALUMINIUM

Long lasting and lightweight solution

Cast Aluminium - the obvious choice for the discerning specifier or installer. A large range of sizes and styles with round, square or rectangular pipe options, available Powder Coated finish in any RAL colour.

63

BESPOKE ALUMINIUM

Contemporary styling

Aluminium is a metal with exceptional characteristics, both in respect of its functional performance and sustainable credentials. Recyclable, strong, versatile, lightweight, and highly resistant to corrosion.
